

令和 8 年度 熊本県立大学 環境共生学部 環境共生学科 食健康環境学専攻
社会人選抜 英語 出題意図

The examination was created under the assumption that, by the time of university entrance, working students aiming for entrance in the Department of Environmental and Symbiotic Sciences, Division of Food and Health should have at least the grammatical and social communicative competency skills equal to a high-beginning level of English proficiency that they have learned over time during study and in life. These learned skills should therefore include beginning level English grammar, English reading competency for basic sciences, reading comprehension for basic sciences, and English writing for basic sciences, including basic science vocabulary in English, proper adjective usage, and proper subject verb agreement. Students should also possess a basic command of English writing structure gained through employment, and should show basic writing organizational skills gained through life skills on the job.
